

Viscose Rayon Fiber for Facial Mask

スキンセル *Skincel*

It is a viscose rayon fiber that is suitable for facial masks etc.

By containing plenty of lotion, it wraps the skin with its beautiful translucence.

Ecofriendly

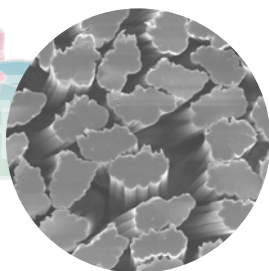

We have produced viscose rayon fibers for more than 80 years and we have recently developed a highly safe rayon fiber "Skincel" suitable for nonwoven fabrics used in cosmetics, especially facial masks.

"Skincel" is a viscose rayon fiber that has a softness and luster similar to silk and that was so-called artificial silk in the old, made to fit in the cosmetics field.

"Skincel" can contain plenty of lotion, and when it contains plenty it becomes translucent. It also has an effect to promote the transfer of lotion to the skin.

Skincel

VISCOSE RAYON

The fiber "Skincel" has a smooth surface and a characteristic shape. This characteristic fiber shape gives a transparent feeling when wet.
